E SERIES

Now available with USB charging ports, E Series phones are amazingly big on features, yet surprisingly small in size. Teledex E Series phones are 40% smaller than standard guest room telephones, creating an entirely new category in hotel telephony design.

Specify optional USB charging ports in single and two-line, analog, VoIP, corded, and cordless configurations with up to 12 programmable guest service keys on desk units, and 0, 3, or 6 guest service keys on RediDock remote handset kits.

E Series flat panel, compact style adds a touch of elegance to any room without compromising functionality. Originally styled to meet the limited space and energy requirements aboard cruise ship cabins, E Series micro-footprint phones require minimal surface area on the desk and nightstand.

Interior designers appreciate the sophisticated extra thin, ultra-stylish body while guests enjoy the familiar, comfortable feel of a sleek, modern handset. Engineered specifically for hospitality applications, E Series phones are equipped with patented OneTouch voice mail technology for hands-free auto-dialing and retrieval, and customizable faceplates.

Give your guests the elegance they deserve.

E Series VoIP Cordless

E Series RediDock

E Series Trimline

- Available in single- and two-line, analog, VoIP, corded, and cordless configurations.
- Professional quality speakerphone.
- Optional USB charging ports.
- Patented OneTouch voice mail retrieval technology.
