

HOTstream Cast

Your guest's content on the big screen.

MCOMS solution allows you to deploy Chromecast devices in the guest room giving the guests the same content streaming experience they enjoy at home.

For the Hotel, the solution provides managed access to the cast devices, minimal requirements on your existing network infrastructure, monitoring by your staff and protection of guests' privacy.

“MCOMS has a long history in designing reliable and high end solutions for the hospitality industry and we knew we could depend on them. Our goal is to continue to differentiate our property in the minds of guests while catering to their desire for personalized entertainment options.”

TATIANA FREITAS
DIRECTOR OF FINANCE & BUSINESS SUPPORT
