YOUR DIGITAL GUEST DIRECTORY

Example iPortals – enabling you to provide your information, to your guests, the way you want to.

TiGERtms

For over 40 years TigerTMS has helped hotels around the world improve their communications.

iPortal is a digital assistant on the guest's own handset that provides everything they need before, during and after their stay. Integrated with Fetch F&B order and pay technology, it provides guests with a seamless way to order food and beverages. Branded to the exact requirements of the property, it is easily accessed by QR-code with NO fussy downloads for the guest and NO development costs for the hotel.

TigerTMS hospitality solutions are used by over 10,000 hotels worldwide.
